## **SOLARWATT BATTERY WITH FRONIUS INTERTERS**

### **Fronius International GmbH**

Hereby confirms that the Fronius inverters

- / Fronius Symo 3.0 - 8.2**
- / Fronius Primo 3.0 - 8.2**
- / Fronius Galvo 1.5 – 3.1**
- / Fronius IG Plus V**

can be used in combination with the batteries SOLARWATT MyReserve 500 and SOLARWATT MyReserve 800.

The warranty remains valid as long as the design requirements for the PV system are observed. This requires that the permissible input parameters of the inverter (input voltage, input current,...) are not exceeded by the battery and the PV system at any time.

Fronius does not assume any guarantee for the proper functioning of the system or compliance with the safety requirements and standards of the entire system.
